

Streamline Insurance Claims Processing

Streamline claims and contract management processes while controlling corporate risk and compliance. Transform documents, forms, and portfolio information into actionable data to accelerate review workflows and make accurate informed decisions.

Accelerate Case Completeness

Quickly access, read, and flag or annotate documents from a single interface to streamline client exchanges and third-party reviews.

Simplify Contract Underwriting

Accelerate risk assessment for new insurance contracts while meeting strict compliance and security norms with fast, federated access to any content in any format.

Achieve Ongoing Compliance

Automatically redact sensitive content and control every action with detailed audit trails and metrics. As an added layer of security, no changes are ever made to underlying documents or files

Key Features:

Over 50+ file formats

Convert claimant IDs, insurance forms, witness & expert reports, and other complex document formats

Real-time collaboration

User markups appear in real-time while preserving the original file to accelerate review processes.

Built-in security features

Easily configure user permissions, redact PII, and enable audit trails.

Integrate with existing software

Integrate directly with your existing ECM software and workflows.

Automate Workflows

Streamline contract management, claims reviews, compliance workflows, and more with third-party stakeholders.
