CONTROLLING CLAIMS PROCESSING

In the world of claims processing, all relevant information need to be assessed quickly and thoroughly, so that an informed decision made as soon as possible.

ARender

REAL-TIME ACCESS TO ALL INFORMATION

Claims processors need to be able to navigate through large sets of documents, often saved in many different file formats.

COLLABORATION IS KEY

Assessors need to collaborate with many people during a claims process - including the claimant, witnesses, investigators, repair teams, as well as internal teams and experts.

DECISIONS MUST BE AUDITED

As a highly regulated industry an organization processing claims must be able to justify all decisions made - to do this all actions and their triggers must be contained in detailed and compliant audit trails.
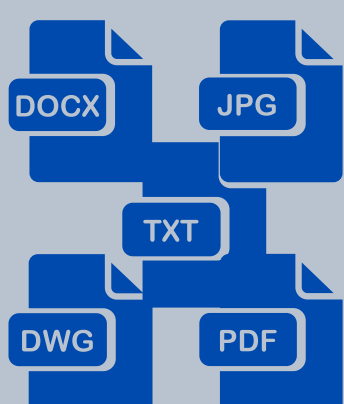

TAKE YOUR CLAIMS PROCESSING TO THE NEXT LEVEL WITH ARENDER

ARender

COLLABORATE ON YOUR CONTENT

Business content is built to be viewed, shared, commented on, and changed. ARender allows users to do this quickly and easily from any web browser.
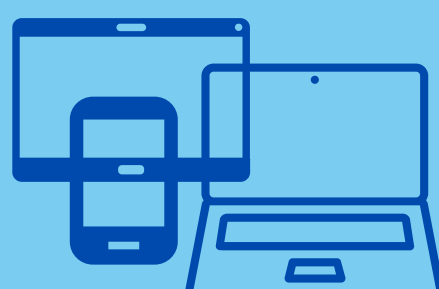

VIEW ANY FILE TYPE

DOCX   JPG   TXT   DWG   PDF

ARender allows you to view and work on over 300 file types including PDF, TIFF, MS Office and even engineering drawings - all without needing any software applications installed on your mobile or desktop.

ANY DEVICE

Modern business requires access to information from any device in any location - 100% of the time. ARender works on any web browser and requires zero installation - perfect for remote workers to get to work wherever they are.

COMPLETE COMPLIANCE

ARender provides multiple levels of security and compliance. From full audit trails to redacted content, every action is carefully controlled - and as an added layer of security no changes are ever made to underlying documents or files.
