

Complex technical requirements,
easy access worldwide.

Key Facts

The Challenge

With over 6,500 users spread across 27 countries, Orsted needed a single solution for users to open and work on technical documents quickly and easily, without the need for high-performance third-party solutions. Their core requirements were:

1. A solution that could support industrial CAD/CAM 2D file formats and allow for quick access and viewing
2. Orsted wanted to be able to annotate documents with watermarks, without sacrificing speed dealing with heavy, complex files. They also wanted the ability to collaborate directly on displayed documents
3. Finally, the organization sought a solution to print files without downloading them to their native applications beforehand

Danish power company
6,500 Employees in 27 countries
Initial deployment to 2,000 local users
Intention to roll out companywide (4,200 global users in 2020 and growing)

The Solution

Orsted deployed ARender Content Viewer for Alfresco with the help of local partner TietoEVRY. The solution was made available to 4,200 global users in tandem with Formtek Engineering Data Management Module for easy management of DAW, CAD and AutoCAD formats. The goal was to evolve the product further to enable Watermark annotations, and eventually deploy companywide. Those users are now easily able to access, annotate, collaborate on, and print rich technical file formats, seamlessly.

In partnership with TietoEVRY for Alfresco
Used with Formtek for CAD file formats edition
Easy management of rich technical documents
Watermark requirements fulfilled and broadly used

Benefits

Despite the risks involved in the project as a multi-partner collaboration, the solution was rolled out seamlessly to Orsted's first 2,000 users. Thanks to ARender, users have an enhanced document visualization and manipulation experience which saves them significant time on technical projects, and cross-agency collaboration on key documents is streamlined.

Users quickly recognized the business benefits of ARender in combination with Formtek, procuring high user adherence straight away.

4,200 ARender Users globally
High user adoption
Enhanced collaboration and productivity
