

The 1-2-3 of eInvoicing

eInvoicing has the potential to transform the way organizations work together, and streamline the typically manual accounts payable and receivable processes. But moving to eInvoicing has not always been easy.

GOVERNMENT MANDATES

are making eInvoicing a reality for many countries and organizations around the world.

BUT MOVING TO EINVOICING CAN BE CHALLENGING

The process of moving to eInvoicing can be difficult, requiring careful change management, migration of complex processes and lots of user training on new systems.

SO WHY NOT MAKE IT EASY??

eInvoicing doesn't have to be difficult. By using simple collaboration, integration, and the ability to view content instantly on any device moving to a new eInvoicing solution can be as easy as 1-2-3.

EINVOICING WITH

DON'T CHANGE THE PROCESS

Much of the resistance to eInvoicing is around the need to change processes. So don't!

ARender allows you to deliver "paperlike" processes on digital invoices. Sticky notes, comments and the ability to discuss an invoice in realtime all help users transition to the new world.

1

INTEGRATE TO EXISTING APPS

If users are comfortable working in specific applications when processing invoices, ARender can allow them to access digital invoices stored in new systems directly from their old system.

While not a long term solution, this approach can help significantly in minimizing the disruption caused by moving to a new eInvoicing system.

2

NEW SYSTEM + REDUCED CHANGE = SUCCESS

By providing easy access to information and collaborative capabilities that mimic previous paper-processes, ARender allows organizations to reduce the pain of migrating to a new eInvoicing system.

Combining the benefits of the new system with minimal change reduces risk and disruption - allowing you to move to eInvoicing as painlessly as possible.

3

ENABLING THE MOVE TO PAINLESS EINVOICING
